SUMMARY

Computer Science student at Evergreen Valley College (transferring to a UC in Fall 2027) with experience building full-stack web apps and backend services in TypeScript, Java, and Python. Seeking a software engineering internship focused on backend development.

EDUCATION

Evergreen Valley College

Jan 2024 - May 2027

Associate in Science for Transfer, Computer Science

San Jose, CA

• **GPA:** 3.87

• **Coursework:** Introduction to Java, Data Structure and Algorithms, Object-Oriented Programming, Foundations of Data Science, Discrete Structures, Structure and Interpretation of Computer Programs, Calculus I, Calculus II, Multivariable Calculus, Intro to Linux/Unix

PROJECTS and HACKATHONS

EVC Tutor Schedule <https://evctutoring.com/>

- Built a full-stack CRUD web app that lets Evergreen Valley College admins add, edit, and remove tutors, the courses each tutor covers, and their weekly availability (day, time, and location), all from a login-protected admin dashboard.
- Designed a relational PostgreSQL schema with Prisma (tutors, subjects, schedules, terms and holidays, with cascading deletes) and wrote REST API routes that use Zod to validate incoming data.
- Built a public schedule page where students can search tutors by course code and see who is available right now, based on the current term and campus holidays.

OnTrack - HackMIT 2026 <https://plume.hackmit.org/project/bkosr-lsgra-ltfcy-ekkrm>

- Built the React Native phone app for a wearable freezing-of-gait detector in a 4-person team, displaying the patient's live state (walking, freezing, or standing still) from the device's on-board AI model.

RoboJab - UC Berkeley AI Hackathon 2026 <https://devpost.com/software/robo-jab>

- Won 2nd place for Best Physical AI Hack with a 4-person team that turned phone video into a control policy for a Unitree G1 humanoid robot; recorded and prepared the training video data.

Learnr - Cal Hacks 12.0 <https://devpost.com/software/learnr-x8bpqd>

- Built the voice feature for an AI tutor in a 4-person team, using the VAPI API so students can hear a lecture on any topic and interrupt at any time to ask questions.

EXPERIENCE

Evergreen Valley College

Java Programming Tutor

San Jose, CA • Sep 2025 - Present

- Tutored beginner students one-on-one in Java fundamentals, including variables, loops, conditionals, and methods, using hands-on coding exercises to help them write and debug their first programs.

Data Science Embedded Tutor

San Jose, CA • Jan 2025 - May 2025

- Provided hands-on tutoring in Python/NumPy, guiding students through data cleaning, statistical analysis, debugging, and introducing machine learning workflows such as regression and classification.

LEADERSHIP EXPERIENCE

Evergreen Valley College CS Club

Sep 2026 - Present

Vice President

- Co-plan the club's 2026-27 meeting curriculum with the President, covering basic programming (Python, HTML/CSS), LeetCode interview practice, hardware workshops, and AI/machine learning.

Evergreen Valley College CS Club

Jan 2024 - May 2024

Project Manager

- Led a 4-member team to assemble and test an autonomous Raspberry Pi robot tank in 8 weeks, assigning tasks, setting weekly goals, and giving regular status updates to keep the project on schedule.

SKILLS

- **Programming Languages:** Java, TypeScript, JavaScript (ES6+), HTML/CSS, SQL, Python
- **Libraries & Frameworks:** Spring Boot, React, JUnit, Numpy, Scikit-learn
- **Developer Tools:** Git, Linux, Vim, Flyway, IntelliJ IDEA, AWS, Maven, Github, PostgreSQL, Vite
