SUMMARY

I am a Computer Science student with experience in Java, and I am currently strengthening my skills in JavaScript and Java. As a sophomore at Evergreen Valley College, I tutor Java programming, which supports my peers while deepening my own understanding. I will earn my **Associate's Degree** in **Computer Science** starting in **May 2027** and transfer to a **University of California** in **Fall 2027**, with an anticipated **Bachelor's Degree** completion in **May 2029**. I am passionate about software development and eager to continue learning as I prepare for my first software engineering internship.

EDUCATION

Evergreen Valley College

Associate in Science for Transfer, Computer Science

Jan 2024 - May 2027

San Jose, CA

• **GPA:** 3.87

• **Coursework:** Introduction to Java, Data Structure and Algorithms, Object-Oriented Programming, Foundations of Data Science, Discrete Structures, Structure and Interpretation of Computer Programs, Calculus I, Calculus II, Multivariable Calculus, Intro to Linux/Unix

SKILLS

• **Programming Languages:** Java, TypeScript, JavaScript (ES6+), HTML/CSS, SQL, Python (Data Analysis)

• **Libraries & Frameworks:** Spring Boot, React, JUnit, Numpy, Scikit-learn

• **Developer Tools:** Git, Vim, Flyway, IntelliJ IDEA, AWS, Maven, Github, PostgreSQL, Vite

PROJECTS

EVC Tutor Schedule Project <https://evctutoring.com/>

- Built a full-stack tutor scheduling web app with **Next.js 16**, **TypeScript**, **PostgreSQL**, and **Prisma** to replace manual spreadsheet management with a centralized, real-time admin interface - currently being adopted by the EVC Tutoring Center manager for production use.
- Implemented **custom JWT-based authentication** from scratch using signed **httpOnly** session cookies and Next.js middleware, securing all admin routes without any third-party auth library.
- Integrated the **Google Gemini API** to parse raw tutor email replies into structured schedule data, reducing multi-tutor onboarding from manual entry to a single paste-and-click workflow.

Robo-Jab (UC Berkeley AI Hackathon 2026) <https://devpost.com/software/robo-jab>

- Contributed as part of a 4-person team that won "Best Physical AI Hack," building a pipeline that turns phone video into a trained control policy for a 29-DoF Unitree G1 humanoid robot.
- Recorded and organized boxing-jab video clips used as training data for the motion-capture-to-robot pipeline (GVHMR, GMR, MLP-based policy training).

Learnr (Cal Hacks 12.0) <https://devpost.com/software/learnr-x8bpqd>

- Designed and developed an AI-powered learning tutor using **TypeScript** (React) and **Node.js** (JavaScript), integrating the VAPI API to deliver conversational lectures where students can interact, ask questions, mute, or end sessions at any time.
- Collaborated closely with a team of four, facilitating regular communication to align feature development, share technical insights, and ensure the AI tutor seamlessly fit into the broader project goals.
- Led feature integration and code reviews for the AI tutor, proactively gathering team feedback and fostering a collaborative environment that prioritized clear communication, shared understanding, and rapid iteration.

EXPERIENCE

Evergreen Valley College

Java Programming Tutor

San Jose, CA • **Sep 2025 - Present**

- Improved student mastery of Java, OOP, and data structures, increasing course pass rates by ~25% and reducing assignment errors by ~30% through targeted one-on-one tutoring and hands-on coding exercises.
- Delivered a 3-hour workshop on algorithms, debugging, and problem-solving, achieving a 20% increase in students' coding assessment scores through hands-on exercises and targeted feedback.

Data Science Embedded Tutor

San Jose, CA • **Jan 2025 - May 2025**

- Provided hands-on tutoring in Python/NumPy, guiding students through data cleaning, statistical analysis, debugging, and introducing machine learning workflows such as regression and classification.
- Boosted student lab completion and code accuracy by 25%, based on assessment scores and submission rates.

Wellness Pharmacy

Pharmacy Clerk

Los Gatos, CA • **Sep 2023 - Present**

- Utilized WinRx and NimbleRx systems to manage complex insurance data and prescriptions, resolving system and claim issues through coordination with providers.
- Translated complex insurance processes and medical systems into clear guidance for patients, managing multiple high-priority tasks in a fast-paced environment.

LEADERSHIP EXPERIENCE

Evergreen Valley College CS Club

Sep 2026 - Present

Vice President

Evergreen Valley College CS Club

Jan 2024 - May 2024

Project Manager

- Led a 4-member team to deliver an autonomous Raspberry Pi G1 tank, achieving ~95% obstacle-avoidance accuracy within 8 weeks by coordinating hardware integration and iterative navigation testing using pre-built modules.
